Volume contents

Volume 59 (2000)

N.A. Murray, T.L. Watts, I.A.G. Roberts (UK)
Thrombopoietin in the fetus and neonate 1

A. Siddiqui, B. Hägglöf (Sweden)
Does maternal prenatal attachment predict postnatal mother–infant interaction? 13

M.W. Quinn, A. Vokes (UK)
Effect of morphine on respiratory drive in trigger ventilated pre-term infants 27

J.L. LeFlore, W.D. Engle, C.R. Rosenfeld (USA)
Determinants of blood pressure in very low birth weight neonates: lack of effect of antenatal steroids 37

H.U. Bucher, R. Baumgartner, N. Bucher, M. Seiler, J.C. Fauchère (Switzerland)
Artificial sweetener reduces nociceptive reaction in term newborn infants 51

M.S. Vääräsmäki, A.-L. Hartikainen, M. Anttila, S. Pramila, M. Koivisto (Finland)
Factors predicting peri- and neonatal outcome in diabetic pregnancy 61

Announcement 71

Instructions to Authors 73

C.S. Edstrom, D.A. Calhoun, R.D. Christensen (USA)
Expression of tissue factor pathway inhibitor in human fetal and placental tissues 77

N.N. Doherty, P.G. Hepper (UK)
Habituation in fetuses of diabetic mothers 85

Y. Andersson, S. Lindquist, C. Lagerqvist, O. Hernell (Sweden)
Lactoferrin is responsible for the fungistatic effect of human milk 95

I. Brandt, E.J. Sticker, M. Höcky, M.J. Lentze (Germany)
Transient abnormal neurologic signs (TANS) in a longitudinal study of very low birth weight preterm infants 107

M. Page, H. Jeffery (Australia)
The role of gastro-oesophageal reflux in the aetiology of SIDS 127

H. Togari, I. Kato, N. Saito, N. Yamaguchi (Japan)
The healthy human infant tends to sleep in the prone rather than the supine position 151

S.-F. Jeng, K.-I.T. Yau, H.-F. Liao, L.-C. Chen, P.-S. Chen (Taiwan)
Prognostic factors for walking attainment in very low-birthweight preterm infants 159

F.J. Walther, A.L. den Ouden, S.P. Verloove-Vanhorick (The Netherlands)
Looking back in time: outcome of a national cohort of very preterm infants born in The Netherlands in 1983 175

D.J. Beech, P.D. Sibbons, C.V. Howard, D. van Velzen (UK, The Netherlands)
Terminal bronchiolar duct ending number does not increase post-natally in normal infants 193

N. Modi, P. Bétrémieux, J. Midgley, G. Hartnoll (UK)
Postnatal weight loss and contraction of the extracellular compartment is triggered by atrial natriuretic peptide 201

C.A. Browne, P.B. Colditz, K.R. Dunster (Australia)
Infant autonomic function is altered by maternal smoking during pregnancy 209
